

The background of the slide features a microscopic view of cells, likely MUSE cells, growing in petri dishes. The cells are visible as small, round, golden-brown structures with darker outlines, scattered across the white background. The petri dishes are also visible as circular frames.

CEO

THE OFFICIAL STANDARD IN REGENERATIVE BIOTECHNOLOGY

Neorgana is an officially authorized company by MUSE Cell Innovations (MCI)—the sole holder of the global intellectual property for Dezawa MUSE Cells™, discovered by Professor Mari Dezawa, M.D., Ph.D.

This exclusive authorization positions Neorgana as the licensed distributor and scientific authority for authentic MUSE Cell-based biologics, ensuring that every therapy under our name adheres to the highest scientific, ethical, and quality standards.

PRODUCTS

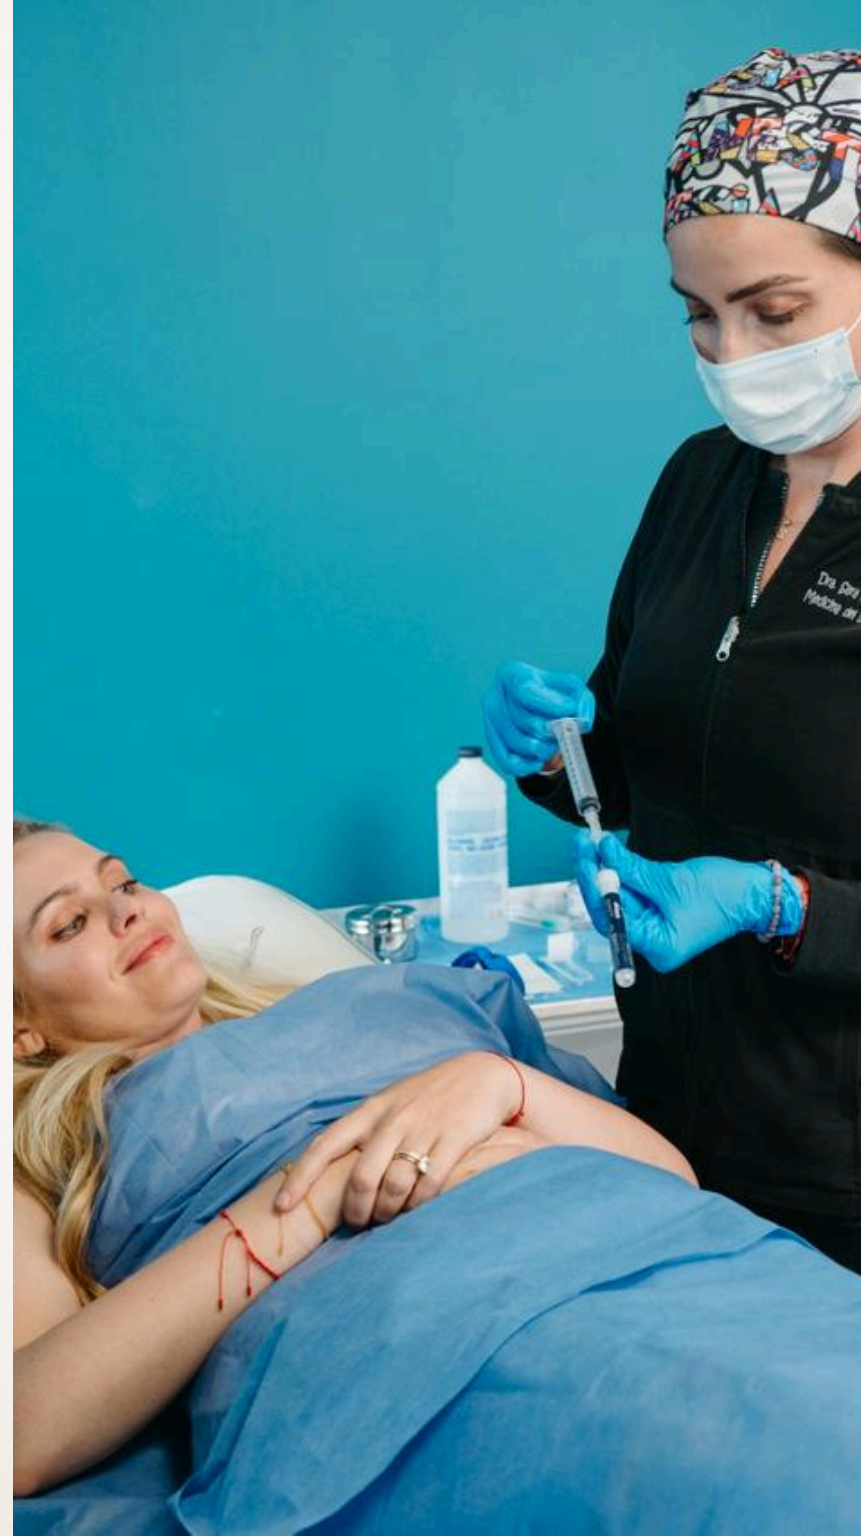

AUTHENTICITY. INTEGRITY.
CELLULAR EXCELLENCE.

Every MUSE Cell distributed through Neorgana is authentic, traceable, and validated through SSEA-3 and Oct3/4 pluripotency markers—the molecular hallmarks of genuine Dezawa MUSE Cells™.

All biologics are managed under the highest international standards, ensuring purity, viability, and complete scientific integrity from origin to clinical application.

Neorgana's purpose goes far beyond distribution.

We build a framework of education, precision, and ethical excellence, empowering certified physicians to deliver measurable regenerative outcomes grounded in authentic, peer-validated science.

TRAINING. CERTIFICATION. PRECISION IN PRACTICE.

All physicians and clinics affiliated with Neorgana are trained and supervised by our specialized medical team, ensuring consistency, safety, and excellence across every therapeutic protocol.

Our certification programs include advanced IV, intranasal, ultrasound-guided, and fluoroscopy-guided application protocols for conditions such as autoimmune disorders, neurodegenerative diseases, stroke recovery, organ failure, injury repair, chronic pain, anti-aging, and cosmetic regeneration, among others.

Certified partners also receive exclusive benefits and priority access to Neorgana's most advanced training programs, including continuous education in emerging cellular applications, precision regenerative medicine, and scientific innovations within the MUSE Cell framework.

Through this integrated model, Neorgana ensures that every practitioner operates with technical mastery, ethical responsibility, and scientific accuracy, honoring the authenticity and legacy of Dezawa MUSE Cell™ therapies.

A NEW ERA OF REGENERATIVE SCIENCE

Neorgana represents the intersection of Japanese biotechnology, advanced medical research, and international clinical collaboration. Aligned with MCI's vision, we safeguard the authenticity of Dezawa MUSE Cells™ while expanding access to next-generation regenerative platforms. Every therapy distributed under Neorgana embodies one unshakable principle: authentic science, trusted origin, and uncompromised results.
